

Different coat of arms manhole covers "perfectly presented".

More individuality with high-quality motif manhole covers from MeierGuss!

A motif is built.

The templates for the special scenes can be varied. For example it's possible to use 2D-drawings, graphics or also pictures. First of all Meierguss creates from the basis a CAD-model.

Working from these we generate a program for the processing with our in-house CNC-machines.

Finally we create the special scene model plates which than will be insert in the standard model plates.

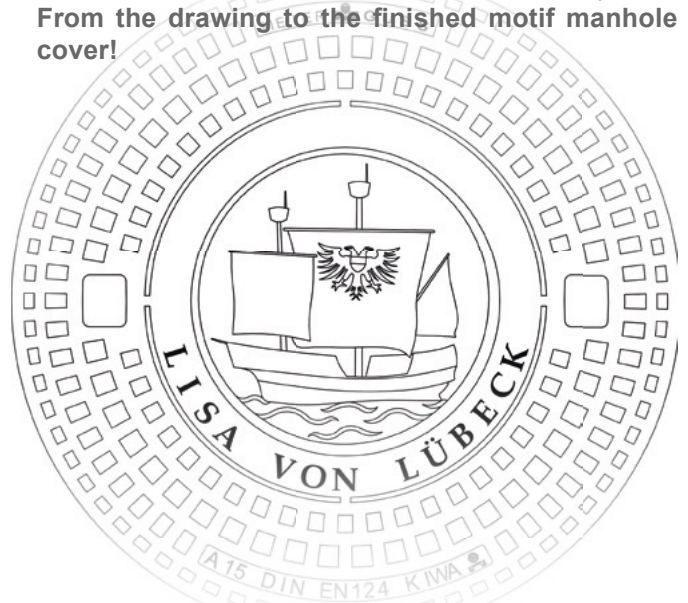

From the drawing to the finished motif manhole cover!

Now the model plate will be milled in the model shop.

The German Hanseatic Ship „Lisa von Lübeck“ sails on the motif manhole cover from MeierGuss.
